

RESIDENTIAL APPLICATION

Aquatechnik group spa

OBJECT: Aquatechnik supplies hydraulic systems SAFETY facilities, patented by the company for the full installation of cold and hot water in the Bahía resort centre, Oran (Algeria).

Description:

The complex consists of 4 towers of 120 luxury apartments in each.

Its location on the Algerian coast and easy accessibility to the port and the airport, and the city of Oran, make this residence a developing center of business in North Africa

Aquatechnik, has equipped these apartments with their extraordinary Safety-Pol system currently considered, in Europe, the best and safest fluid distribution system with exceptional ease of assembly on site.

All Multi-calor pipes made with multilayer system polyethylene - aluminum - PEX polyethylene and PPSU fittings are manufactured with the most advanced technology today, thinking about the comfort of its residents.

Under the complex we find five underground floors. This project was completed with a large shopping center in its next phase thanks to the approximately 50,000 m2.
